

Humanitarian project application

Organisation name	State educational institution "Teterinsky secondary school named after A.S. Lukashevich"
Address	213188, Republic of Belarus, Mogilev region, Krugglyansky district, agricultural town Teterino, Shkolnaya street, building 22,
Position of the contact person	Director of an educational institution
Name, surname of the contact person	Alekhnovich Vladimir Adamovich
Contact details for liaison	375223474434 teterino@krugloe.gov.by
The project title	From school stadium to health and longevity
The Project duration, years	1
The Target group	Students of educational institutions, teachers, residents of the agricultural town of Teterino
Place of project realisation	213188, Republic of Belarus, Mogilev region, Kruglyansky district, Teterino agricultural town, Shkolnaya street, building 22
Justification of the problem taking into account the baseline situation in the project region	Teterin High School has been operating since 1952. The educational institution is focused on meeting the needs of children in physical education and sports. For 13 years, the institution of education has occupied a leading position in regional sports competitions, is the owner of the regional cup "Spartakiad." The school organizes the work of sports sections in volleyball, cross-country skiing and table tennis.
Project Aim	<p>Since 2021, the educational institution has been a member of the regional project "School - Territory of Health." Solving the problem of preserving and strengthening the health of children and adolescents, promoting a healthy lifestyle are priority areas of work of the educational institution. In recent years, there has been a deterioration in the health of school-age children. The number of absenteeism by students due to illness is increasing. On the basis of the educational institution there is a sports hall and a stadium, which does not allow to fully reveal the potential of students and organize extracurricular activities. The long-term operation of the stadium has led to the fact that at present it needs a large reconstruction (zoning, leveling, etc.) and updating its equipment. Sports equipment (mainly volleyball, basketball and soccer balls) is purchased annually. Carrying out a number of land works by the educational institution, repair, manufacture and installation of sports equipment do not allow the school stadium to meet modern requirements for conducting physical education classes. It is not possible to reconstruct the stadium on your own. The area of the stadium is 580 m², the stadium is located near the river and does not have a fence, the stadium does not have a treadmill, there is no modern sports ground intended for game sports, the sector for long jumps with a run requires repair. A major renovation of the stadium is currently required.</p> <p>The modernization of the stadium will promote the health of children and promote a healthy lifestyle; will help organize the interaction of parents, students and educational institutions; will motivate children to play sports; will ensure their employment in their free time. It is important that the new coverage on the football field and sports grounds and new equipment provide a high level of safety necessary for children and adolescents. Not only students, but also local residents will be able to study at the stadium.</p>
Project Summary	Popularization of a healthy lifestyle, formation of a conscious attitude towards their health among students, increasing the effectiveness of sports and recreational work through improving the sports infrastructure of an educational institution.
Planned number of trenches	1
Currency	USD
Total	45500
Donor funds	45500
Co-financing	500

Further activities at the end of the project	<p>“The operation of a modern stadium on the basis of an educational institution, which fully satisfies the requirements for planar structures, will make it possible to conduct high-quality lessons in “Physical Education and Health”; conduct sports section classes, sports festivals, and regional sports competitions at a high level.</p> <p>At the end of the project, the work of sections for children of different ages “TOGETHER” will be organized; new sports sections for children will open: “Young volleyball player”, “Soccer school”, “Athletics”; The work of the “Health Group” section will be organized for everyone. "</p>
The envisaged objectives during the project work	<p>modernize the sports infrastructure of the stadium in accordance with modern safety and comfort requirements;; organize leisure time for children, youth and parents by involving them in sports and physical education;; solve the problem of temporary employment during the summer and after-school periods in order to eliminate cases of students committing illegal acts and eradicating bad habits that have a detrimental effect on their health;; improve conditions for the development of children's and youth sports;; conduct physical education, recreation and sports events at various levels;; develop various sports, taking into account the interests of students.</p>
