The project title	"Future without borders"
The Project duration, years	2
The Target group	Visually impaired people, senior citizens, including those affected by the accident at the Chernobyl nuclear power plant.
Place of project realisation	Republic of Belarus, Minsk, swimming pool "Volat", st. Shabany, 17
Justification of the problem taking into account the baseline situation in the project region	At the moment, not a single swimming pool in Minsk has equipment for comprehensive equipment and adaptation of people with disabilities, which is a problem for this category of citizens to visit such social facilities. Swimming pool located at: st. Shabany, 17, in the Zavodskoy district of Minsk is also not equipped to provide recreational swimming services to the visually impaired. Today in Minsk there are 3,177 people with visual impairments, including people who suffered from the accident at the Chernobyl nuclear power plant. During the implementation of the project, we plan to solve this problem by equipping the facility with elements of a barrier-free environment for the blind and visually impaired.
Project Aim	Ensuring the provision of physical education and health services to elderly citizens, people with disabilities, including victims of the Chernobyl nuclear power plant, who have vision problems by creating a barrier-free environment at the facility (Volat swimming pool).
Project Summary	<p>1. Inspection of the facility and preparation of an opinion on the implementation of work to create an accessible environment for people with visual disabilities;</p> <p>2. Purchase and installation of equipment for the arrangement of barrier-free access in the swimming pool "Volat":</p> <ul style="list-style-type: none"> -acquisition and installation of voice-sound electronic informants with remote control for navigation of disabled people around the pool; -acquisition and installation of floor coverings (warning and guides), ensuring the safety of movement around the facility; -acquisition and installation of information plates with embossed graphics and bold-point braille in A3, A4, A5 format and non-formatted sizes for the best information for people with low vision; -acquisition and installation of tactile mnemonic diagrams A3 + A3 for information and security; -Acquisition of the yellow circle required to indicate entry and exit on glass doors. - purchase of brochures in Braille to inform about the list of services, the Rules for visiting the pool, etc.
