The project title	"Opportunity to be equal"
The Project duration, years	3
The Target group	resident people with reduced mobility; located in the palliative department of the institution.
Place of project realisation	220070, Minsk, 33 Vaupshasova str.
Justification of the problem taking into account the baseline situation in the project region	<p>1.Relevance of multifunctional beds with an automated lifting and relocation rail system: Currently, many social institutions and residential buildings in Minsk are not equipped with the necessary specialized medical devices and systems for the care of bedridden patients. This results in significant inconvenience for patients, and the staff faces high physical and emotional burdens. The acquisition and installation of 20 multifunctional beds with rail systems for automated lifting and relocation within the room and between other rooms will significantly ease care, enhance comfort, and reduce the risk of injuries for both patients and healthcare workers.</p> <p>2.The improvement of the quality of life for people with disabilities through creating home-like living conditions and ensuring their productive engagement: improving the conditions in social institutions to make them more home-like will help them feel more comfortable and confident, which, in turn, promotes faster recovery and a higher quality of life. Additionally, providing people with disabilities with productive engagement that aligns with their interests and abilities is a significant factor in their rehabilitation and social adaptation.</p>
Project Aim	improvement of living conditions for citizens who are on bed rest, by updating and improving their comfortable living conditions to reduce the burden on service and medical personnel when taking care of them.
Project Summary	purchase of specialized multifunctional beds designed to ensure comfort in service, the rail system for automated lifting and movement of residents on bed rest within one room and between other rooms.
Planned number of trenches	15000
Currency	USD
Total	15000
Donor funds	14000
Co-financing	1000
Further activities at the end of the project	Implementing a similar system in other sections of the boarding house.

The envisaged objectives during the project work	<ol style="list-style-type: none"> 1. Purchase and install 20 multifunctional beds with a rail system for automated lifting and moving of residents on bed rest within one room and between other rooms.; 2. To improve the quality of life of disabled people in the institution by bringing living conditions as close as possible to the home environment and ensuring their productive employment; 3. To organize the implementation of a set of services and activities aimed at the development (compensation, restoration) of disabled people's skills and abilities necessary for living, social and labor employment and social interaction.
Description of project activities	purchase of specialized multifunctional beds designed to ensure comfort in service, the rail system for automated lifting and movement of residents on bed rest within one room and between other rooms.
Expected Result	improvement of living conditions for citizens who are on bed rest, by updating and improving their comfortable living conditions to reduce the burden on service and medical personnel when taking care of them.
